應用實例

用於檢測細胞凋亡

Detection of Apoptotic Camptothecin-treated Jurkat by Annexin V Staining.
Jurkat were left untreated (left) or treated with 1 μ M Camptothecin treated for 4 h (right) and then stained using Annexin V-APC. The combination of Annexin V (PKSH033460), APC labeled allows for the distinction between apoptotic cells (Annexin V-APC positive) and viable cells (unstained).

細胞增生測試

Recombinant human IL-6(PKSH033611) was measured in a cell proliferation assay using TF-1 human erythroleukemic cells. The ED50 for this effect is 20-100pg/ml.
