

These packages are designed to offer cost-effective, time-saving solutions to meet your small-scale rush needs in as fast as 8 days, with a sizable production capability for more than 5,000 samples. We offer three packages for either supernatant or purified antibody samples, in addition to expression plasmids. All packages meet the high quality, international standards.

SMALL-SCALE PACKAGES

RUSHMAB®

RushMab®-Gene

RushMab®-Super

RushMab®-Mini

RushMab®-Standard

Package	Deliverables	Time
RushMab® - Gene	• 100 ug transfection grade expression plasmids • Sequencing Verification, Endotoxin Control	4 days
RushMab® - Super (24/96-well plate)	• 1 ml supernatant, expression plasmids • Guaranteed titer detection	8 days
RushMab® - Mini	• ≥100 ug purified antibody, expression plasmids • SDS-PAGE, SEC-HPLC	10 days
RushMab® - Standard	• ≥1 mg purified antibody, expression plasmids • SDS-PAGE, SEC-HPLC, endotoxin <1 EU/mg	10 days

*Antibody type: IgGs, Fabs, VHs, scFvs.

*For RushMab® - Gene, a minimum sample size of 10 is required.
